April,
1939

Gentlemen:

We take pleasure in handing you our 1939 Paint, Glass
and Sundry Catalogue.

We strongly recommend that you look over this catalogue
very carefully as you will find a large number of new lines which
will prove to be an added source of profit in your business.

Our Monarch Paints, Varnishes and Enamels have been thor-
oughly tested and are being used by the largest users of Paint in
Alberta. All Monarch Paint Products are fully guaranteed to give
entire satisfaction when applied according to directions shown on
every can.

Color Cards will be furnished on request.

We are sole wholesale distributors for the famous Murphy
Lacquer Finishes, Boeckh's Brushes and Calcimo Decorative Wall
Coating.

Your discount is 50% off the list price with the exception of
items listed showing a special discount, such as Window Glass,
Plate Glass, Auto Glass, Mirrors, etc. Current market prices on
Linseed Oil and Turpentine are quoted by mail when prices change.
Your name will be placed on our mailing list on request.

We greatly appreciate your patronage and assure you that all
orders with us will receive our prompt and careful attention.

Yours very truly,

THE NEW 2 - Coat System

Monarch House Paint

No Home Owner Can Afford
to Paint before getting
ALL THE FACTS
on
Monarch 2-Coat System

Monarch Outside Primer Undercoat

—Is made with pure lead and other reinforcing pigments, together with specially treated vitolized Linseed Oils, which seals the pores in the wood and clings fast to old paint.

Monarch Outside Primer Undercoat gives exceptional covering and bonding qualities, resulting in better appearance and longer life of the finishing coat.

THE ONLY WAY TO SECURE A SATISFACTORY TWO-COAT REPAINT JOB

Monarch Outside Primer Undercoat has been thoroughly tested in our laboratories and has been adopted by the leading paint manufacturers in United States. The surprising feature is the BIG saving together with a satisfactory paint job.

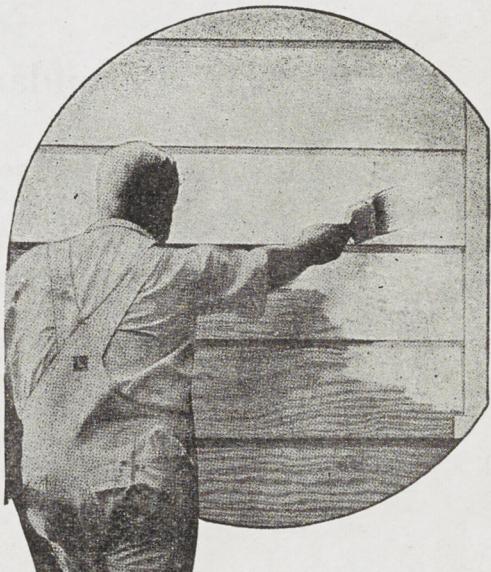

May be had in White, Cream and Grey.

All Colors.....

2 - Coat System

For Outside Painting
New or Repaint Work

DIRECTIONS

Apply as the paint comes in the can. Do not mix this primer with any other paint. Thin only when absolutely necessary, using the smallest possible amount of Turpentine. Do not brush the primer too much, but apply a moderately full coat. Allow 48 hours before applying succeeding coat. Finish with Monarch Pure Paint. Do no use the primer as a finishing coat.

1-Gal.	1/2-Gal.	1/4-Gal.
\$6.60	\$3.46	\$1.80

MONARCH GLO-TONE

Is a New Quality Paint for Interior Walls and Woodwork

Glo-Tone is alkali-proof withstanding the action of soaps and scrubbing. Dries with a tough hide-like finish that will not crack nor peel. In spite of its fast drying properties, Glo-Tone is easy to brush, and is self-levelling, leaving the surface free from brush marks so often found in old-fashioned interior finishes.

Made in Twelve Beautiful Colors, also White in both

NEW

MONARCH ENAMEL

GLYPTONE SYNTHETIC FINISH

SUPERIOR TO ENAMEL

THE NEW AUTO AND INDUSTRIAL ENAMEL

BRUSHING AND SPRAYING

The art of making good finishing materials is progressing with great and rapid strides. Every month brings changes and improvements; products considered the "last word" a few short years ago have become obsolete—superceded by developments of marked superiority.

Glyptone Synthetic Finish Enamels are such a development. Based upon scientifically controlled resinous compounds they embody every desirable characteristic of a fine vehicle finish—speed of dry—great durability and color retention under toughest sort of usage.

May be had in 16 beautiful colors and any number of different shades may be had by mixing two or more colors together—also black and white.

	1 Gal.	1/4 Gal.	1/8 Gal.	1/16 Gal.

BARN, BRIDGE AND ELEVATOR PAINT

Alberta Red Barn Paint

Alberta Red Barn Paint is made of Pure English Red Oxide mixed in scientific proportions and finely ground by the most modern machinery, so that every particle becomes thoroughly incorporated with the oil, producing a paint that is unsurpassed for painting barns, silos, roofs, fences and grain elevators. It is a bright red that remains red, notwithstanding the effects of sun, rain and snow. If properly applied will wear and look well for many years.

Two coats are sufficient on old work but for new work three coats should be applied for best results. Allow 36 hours for drying between coats.

It should be applied in thin coats and brushed out well.

Covering Capacity: One gallon of Alberta Red Barn Paint on an average surface will cover about 350 sq. ft.—two coats.

Per Gallon	5 Gals.	1 Gal.
	\$4.20	\$4.40

Bridge-Barn-Elevator Paint

In point of durability and protective value, this paint is of a very high standard. It works easily, dries with a high gloss and has good covering qualities.

Its excellent durability and power to resist the elements, makes it a most valuable covering for roofs, barns, fences, freight cars, freight houses, grain elevators and all out-buildings, and it also will give excellent service when used on bridges and all classes of structural iron and steel work.

One gallon covers about 300 sq. ft.—two coats.

Monarch Acid Stains

These stains are manufactured from non-fading colors, and produce unique and beautiful effects. They are intended for use on hard, open-grained woods, though they may also be used with satisfaction on some close-grained woods of harder texture such as maple and birch. Where used on open grained woods, the stain should in all cases be applied before the wood is filled. If stain is too dark, lighter shades may be obtained by reducing with water. For best results, the wood to be stained should first be sponged with water and sanded before applying stain. These stains dry in about two hours.

Colors: Dark Mahogany, Fumed Oak, New Silver Grey and Walnut.

MONARCH

SUPERFINE

QUICK DRYING FLOOR VARNISH

Under the most severe tests this Varnish has proved superior to any other varnish on the market for floors and linoleums.

May also be used on furniture, wood work and all interior surfaces.

It dries in 4 to 6 hours, but overnight drying is recommended.

Stocked in Clear Gloss, Light Oak, Dark Oak, Walnut, Mahogany, Ground Colors, and Satin Finish.

MURPHY FINE FINISHES

We are the Exclusive Distributors for Alberta

Narvo Super Clear Varnish

Quick drying—dries dust free in thirty minutes, and dries tough and hard, ready for re-coating in four to six hours, depending on climatic conditions—same day re-coating is thus assured.

For refinement of finish Narvo Super Clear surpasses any other varnish we have tested. In paleness of color and fullness of finish, it rivals the finest of slower drying varnishes.

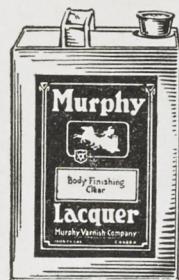

For durability, there is nothing we have tested that surpasses Narvo Super Clear.

For ease of brushing Narvo Super Clear is particularly well adapted to use by comparatively inexperienced brushmen. It flows freely and is easy to work, without fear of "pick-up" and overlapping.

Waterproof, of course. Narvo Super Clear is absolutely waterproof and will not check or turn white in any kind of water. It is resistant to acids, alkalis and alcohol.

Clear Body Finishing Lacquer

A clear Lacquer type material that positively resists the destructive ultra-violet rays of sunlight. May be used as a clear finishing coat or mixed with Lacquer Enamels to enhance lustre and prevent chalking of color.

Gallons.....	each \$12.40
Quarts.....	each 3.30

Lacquer Thinner

We carry only one grade of thinner—and that is the best. A painter will note at once the superior covering, higher gloss and smoother surface if he uses this thinner. Absolutely free from "blushing" in warm or damp weather which is a big fault of most thinners on the market. Don't spoil a good job with cheap thinner. Use only the best.

Paint and Varnish Remover

"Lingerwett" Paint and Varnish Remover is a fast cutting slow drying remover, with wonderful solvent power for rapidly removing varnish, paint, enamel, etc.

A remover that cuts rapidly. Converts varnish into a non-sticky, watery jelly. Remains "wet" and workable for several hours after application.

Does not discolor wood or lift the grain. Requires no knife scraping for varnish removing.

MONARCH OIL

Monarch Oil is an excellent vehicle for all interior and exterior aluminum work where long life and brilliancy are required. Monarch Oil should be applied to new or old wood or cement floors as a first coater. It penetrates deeply, sealing the surface producing an ideal base upon which to paint, varnish or wax, being very elastic it eliminates chipping or cracking.

CALCIMO

The Sanitary Wall Coating. Beautifies Walls and Ceilings

For a quarter of a century the name of "Calcimo" has stood for all that is perfect in an artistic, sanitary wall coating, and has been used more in the home than all other wall preparations put together.

Calcimo is manufactured in a dry powder form, milled in thirty-two beautiful colors and is ready for use when mixed with ordinary cold water. It is easy to apply and dries out with a perfectly even, soft velvety effect.

"Calcimo" is ground finer, works smoother, has greater density, will cover a greater surface per pound than any other Kalsomine. Can be left mixed for a week without spoiling.

Cartons (10 packages).....

5 lb. packages.....

Kegs (100 lbs.).....

Barrels (350).....

Note.—5 lb. packages stocked in white and all colors. Kegs carried in white only. Barrels carried in white and tints, 100, 101, 134, 150.

Casekal Washable Kalsomine

For beautifying walls and ceilings. The principal advantages of Casekal Brand Washable Water Tint aside from its decorative value, practical working properties, washability and the economies which it makes possible are its ability to function properly on unsized surfaces, and the fact that it can be applied to fresh masonry and green plaster forty-eight hours after the walls are constructed.

5 lb. pkgs. per pkg. \$1.50 \$1.50
Bulk, white and colors per lb. .28 .28
350 lb. bbls. per lb. .26 .26

Expert supervision over all manufacturing processes insures a uniform product that meets the most exacting of decorative requirements.

We will be pleased to send you color combinations, folders, interior suggestions, etc., showing effects that can be so easily and inexpensively obtained by use of Calcimo Wall Finish.

The advertising furnished to Calcimo dealers is exceptionally attractive. Color cards can be furnished showing 12 popular shades, 16 shades, 24 shades or the complete line of 32 shades.

The possibilities for soft blending of tints and shades and artistic harmonizing of colors are unlimited.

Calcimo Deep Wall Colors

These colors are similar to the ordinary Calcimo tints and can be used alone where deep effects are required as they have very dense body or covering power. The colors are made in deep, rich, beautiful tones just strong enough to prevent the work drying out stringy. Can be mixed with ordinary white Calcimo so that any number of tints or shades can be obtained. Stocked in 1 lb. packages. Shades

Muralo Patching Plaster

In Muralo Patching Plaster the set is controlled to the required extent to facilitate manipulation during application and to insure uniform drying without shrinkage. It dries out hard and firm, becoming an integral part of the wall itself and provides an ideal foundation for whatever form of decoration that is to follow. It absolutely will not shrink, crack, crumble or develop other imperfections common to Plaster of Paris and less effective materials

generally used for patching purposes.

Ready for use by adding cold water.

Hi-Tex

For Textured and Relief Decorations

Manufactured in dry powder form, and simply requires mixing with ordinary cold water to prepare it for immediate use. The mixture is applied to wall or ceiling surfaces with a suitable brush. Any desired texture may then be developed by manipulating the surface with a brush, whisk broom, comb, stippler, sponge, wad of paper, broad knife or other implement. The surface is then colored and glazed by simple processes.

100 lb. kegs.....	per cwt. \$36.00

MURASTONE

An inexpensive plaster for application to the surface of stoneboard. Designed for easy handling.

Murastone Concentrated Mixing Colors in small bottles. Colors: Cream, Green, Golden tan, Blue and Rose..... Each .90

Per ton (50 lb. sacks)..... \$96.00

Each bottle contains sufficient color for painting the surface of four bags of Murastone after it has been applied to the wall.

The World's Finest Paint For WALLS and CEILINGS

1. *Easy Brushing*: Nu-Wall flows out easily under the brush.
2. *No Brush Marks*: Nu-Wall's ease of application results in a finish free from brush marks or laps.
3. *No Odor*: Nu-Wall is positively odorless in the package, when mixing, or during application.
4. *2-hr. Drying*: Nu-Wall is hard and dry two hours after application.
5. *Washables*: Nu-Wall begins to harden immediately after application. Thirty days later wash with complete confidence.
6. *No Waste*: Nu-Wall does not deteriorate after mixing. Any surplus may be used within a reasonable period.
7. *No Sizing*: Nu-Wall is self-sizing. Even newly plastered walls require only two coats for a perfect finish.
8. *Covering Capacity*: Nu-Wall will cover solid in one coat on most surfaces. A 5-lb. package of Nu-Wall covers 250 to 300 square feet one coat, depending on the surface to which it is to be applied.
9. *Adheres to any Clean Surface*: Nu-Wall may be safely applied on plaster, stone, brick, cement, woodwork and wallboards of all kinds.
10. *No Peeling*: Nu-Wall does not chip, crack or peel. It bonds thoroughly to any clean, non-glossy surface.
11. *Adaptability*: Nu-Wall Tinting Colors are packed separately to permit color matching and variation from standard shades.
12. *Non-Fading*: Nu-Wall Tinting Colors are permanent and sun-fast.
13. *Lime Proof*: Nu-Wall Tinting Colors are lime proof and may be safely used on new plaster or concrete surfaces.
14. *No Glare*: Nu-Wall gives a soft light diffusing surface. White has a reflective index of over 85%.
15. *Permanent*: Nu-Wall becomes a part of the surface to which it is applied. Removal of Nu-Wall is therefore not necessary should oil paint or wallpaper be desired later.
16. *Labor Saving*: Nu-Wall's ease of application and one coat coverage on most surfaces save both time and labor. Brushes are easily cleaned after use, just wash thoroughly under a running tap and hang up to dry.
17. *Costs Less*: Nu-Wall has a low initial cost, in both material and labor, and in addition withstands frequent washing.
18. *Sanitary and Germicidal*: Nu-Wall's freedom from odor, and its germicidal properties make it ideal for Hospitals, Institutions and Public Buildings of all kinds.

WEATHERPROOF CEMENT PAINT LASTS FOREVER

NuCoat

NuCoat

BEAUTIFIES and PRESERVES

WEATHERPROOF CEMENT PAINT

BEAUTIFIES and PRESERVES

For Covering Walls of Stucco,
Porous Concrete, Brick, Tile
and Stone

NuCoat is a superior paint for outside use—it adds color to drab stucco walls and cement, brick or stone surfaces. It not only covers, it actually goes into the surface, becoming a part of its texture and therefore it is permanent.

In addition to the beautifying properties of NuCoat—it has the further advantages of being economical, because it will cover effectively in one coat, although in the lighter tints two thin coats may be needed; it protects the surface by penetrating into the texture rather than forming an unstable film over it.

NuCoat is a dry powdered paint that requires mixing with cold water only. It may be applied with brush or spray. It comes in convenient twenty-five and one hundred pound containers.

Paperhangers' Shears

(Forged Steel)

Japanned Handle, Nickel Blade:
No. 30—12 inch each \$5.90

Diamond Point Driver

A great time saver for anyone doing considerable glazing. Fits the hand, pulls easily, but hits hard. Parts strictly interchangeable.

A real tool, rugged in strength, neat in appearance.

For the Glazier it is an equally indispensable tool for setting panes of any shape or size. Particularly serviceable for glass smaller than 6 ins. No. 1 Regular each \$9.00

Diamond Glaziers' Points

Steel or Zinc

Steel points are manufactured by an improved process from tempered steel which is many times stronger than zinc. They are treated against corrosion, and will stand up to be driven into the hardest wood. Their use renders the troublesome "redrawing" operation unnecessary.

Length of Points: $\frac{1}{8}$ ins.

No. 1 Size: 5000 Points to a package; 9 packages to a box.

1 Package (5,000 each) per pkg. \$1.40
1 Box (9 Pkgs.), (5,000 each) per pkg. 1.20
1 Box (50 Pkgs.), (5,000 each) per pkg. 1.10

Triangle Glaziers' Points

No. 000 No. 00 No. 0

Also carried in Size No. 3, one size smaller than No. 0. Stocked in half-pound packages. Per dozen packages \$2.40

Triangular Points in Counter Display Stand

Instead of passing out Triangular Points in wasteful, loose quantities, it pays better to display "Red Devil" Points in attractive 5c packages. This new idea substitutes sure profit for sure loss. Each package contains a point setter, which makes it possible to drive points with an ordinary hammer or chisel. Per carton (12 pkgs.) each \$.80

Glass Board Ruled Laths

Made of select hardwood that cannot be easily defaced, one inch wide and ruled on one side. Specially intended for countersinking in glass boards. Made in two pieces.

4 ft. each \$4.50
5 ft. each 5.00

Glass Cutters' "T" Squares

Very convenient for use in cutting ordinary glass on a glass board. Saves time and assures a square cut.

Step Ladders

The "Beatty" has many features not found on any other ladder.

There is a steel tie rod under every step with heavy galvanized washers, and the ladder is complete with pail rack. Beatty Ladders are made from No. 1 Douglas Fir material, sizes $3\frac{1}{4}$ x $25\frac{3}{32}$ in.; steps $3\frac{5}{8}$ x $\frac{3}{4}$ in.; top $15\frac{1}{2}$ in. x $5\frac{1}{2}$ in. x $13\frac{1}{16}$ in. The top is made of 20 gauge pressed galvanized sheet steel.

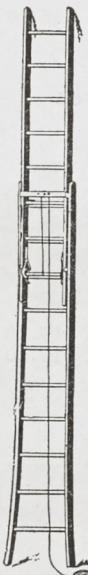

Stock sizes 4 to 12 feet:

Each	7 ft.	\$8.12
4 ft.	8 ft.	9.28
5 ft.	10 ft.	13.00
6 ft.	12 ft.	15.60

Roped Extension Ladders

Our ladders are built with spread bottom to prevent side sway and all ladders 30 feet and over have two tie rods and a centre brace on the first four rungs for further strengthening.

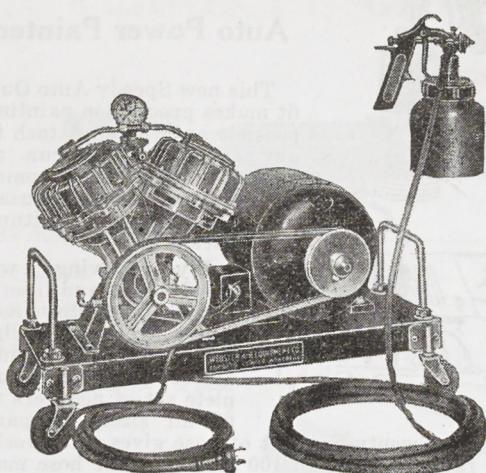

On 16 to 32 foot ladders the sides are $2\frac{1}{4}$ x $1\frac{1}{4}$ inches, and on 34 to 40 foot ladders the sides are $2\frac{3}{4}$ x $1\frac{1}{4}$ inches. The rungs are made from hardwood $1\frac{1}{8}$ inch in diameter with a $\frac{7}{8}$ inch shoulder and let into sides $\frac{3}{4}$ of an inch; this shoulder on the rung rests against the side of the ladder and holds it rigid, overcoming all side sway.

Supplied with a New Hook, the best lock ever put on a ladder; works by gravity, no springs to weaken, rust or get out of order, automatic in action, cannot fail to work, a big safe Hook made from Malleable Iron.

Webster Spray Painting Equipment

No. 302—"V" Twin Outfit

Smooth operation—balanced load—30% to 100% increased spraying efficiency. The V Twin compressor furnished with this outfit has twice the air pumping capacity of the one used on our No. 860 Unit. It has all the features of the 860 compressor—diaphragm sealed piston which positively eliminates all oil from delivered air, splash oil system, double bearing crank shaft, all castings made from high tensil strength white brass, hardened steel crankshaft, V belt drive, and many other features.

The piston strokes are opposed to provide balanced and smooth operation. When operating either our No. 111 or No. 108 gun it will increase spraying rate from 30% to 100% over that obtained with our No. 860 compressor.

We recommend the use of our No. 108 Gun with this compressor for spraying lacquers, synthetic enamels and similar materials where high atomization is desired.

For fast spraying on walls and other large surfaces with lead or oil paints and similar materials, we recommend our No. 111 Gun with or without No. 778 Paint Tank.

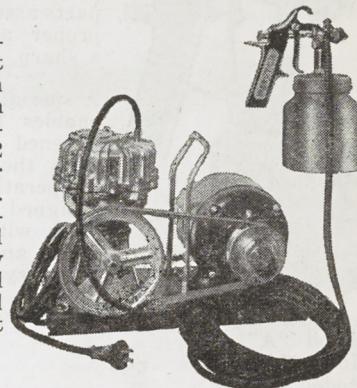

This unit can be operated by a $\frac{1}{2}$ horsepower, constant speed motor, or gasoline engine. The motor pulley furnished with this outfit is correct size for motor or engine having $\frac{3}{4}$ " shaft operating at 1750 R.P.M.

No. 302 outfit includes No. 300 compressor mounted on a metal base with belt, motor pulley, pressure gauge, No. 111 spray gun and 15 feet air hose.

Complete, without Motor \$110.00

Speedy No. 860 Outfit

A sturdy, dependable outfit of production capacity. Driven by $\frac{1}{4}$ H.P. motor and gives 2 cu. ft. of air per minute at 40 lbs. Handles all materials up to and including heavy enamels and will paint walls and buildings at amazing speed.

The Compressor, built on an entirely new principle, has no piston rings to wear or cylinder walls to score. Rubber diaphragm completely separates crankcase from air chambers so that no oil can enter, and clean air is delivered to the gun. Built-in air chamber with safety valve set at 50 lbs. eliminates pulsation. Double bearing crankshaft has positive lubrication. Compressor can be belted to line shaft or other power if desired. Diaphragm can be quickly and cheaply renewed. Capacity $1\frac{1}{2}$ to $2\frac{1}{2}$ cu. ft. of air per minute.

The Gun is of the new pressure feed type with internal mix nozzle of high efficiency. Handles ordinary paint at brushing consistency. Body is precision die cast and nickel plated. Cup is heavy spun aluminum and all wearing parts and nozzles are of hardened steel. Sensitive controls on both paint and air give any required volume of spray from the finest shading to production coverage. Works at 20 to 40 lbs. pressure and uses $1\frac{1}{2}$ to $2\frac{1}{2}$ cu. ft of air per minute.

No. 860—Outfit complete (without motor) \$50.00

No. 840—Compressor only 30.00

No. 111—Speedy Gun only 20.00

No. 778—Pressure Tank

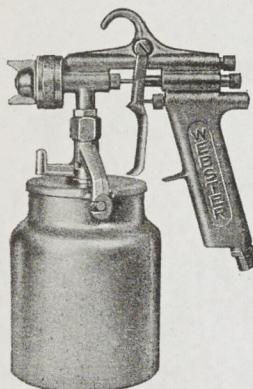

This tank assembly is designed for use with either No. 860 or 781 or No. 302 to make a complete tank type painting outfit.

The 2 gallon paint container is of sturdy construction—yet light and easily carried.

Ten feet of paint and air hose are furnished; these should not be extended, but additional air line up to 100 feet between compressor and tank may be added if desired.

Each, including paint and air lines \$35.00

Model "A" Master Production Gun

Has a self-centering nozzle assembly and the perfect alignment of its parts assures at all times proper atomization and a sharp, even fan spray.

A special control feature enables the fan to be widened or narrowed while the gun is actually in operation. This gun is designed for production work with all materials up to and including heavy synthetic enamels.

Model "A" is made in three nozzle capacities.
 Model "A" 4 4 cu. ft.
 Model "A" 6 6 cu. ft.
 Model "A" 8 8 cu. ft.
 Head only, each \$34.00
 Complete with Clamp-on Cup 40.00

No. 111 Spray Gun

The gun is of the new pressure feed type with internal mix nozzle of high efficiency. Handles ordinary paint at brushing consistency. Body is precision die cast and nickel plated. Cup is heavy spun aluminum and all wearing parts and nozzles are hardened steel. Sensitive controls on both paint and air valve give any required volume of spray from the finest shading to production coverage. Works at 20 to 40 lbs. pressure and uses 1½ to 2½ cu. ft. of air per minute.

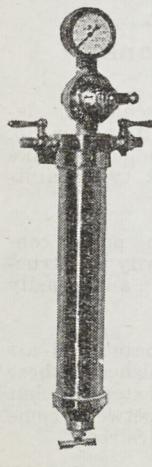

No. 111 Spray Gun \$20.00
 No. 108 Spray Gun 25.00

F.R. Air Transformer

Almost as important as the gun itself if high grade work is desired. Is an efficient oil and moisture separator and this together with a pressure regulator and gauge constitutes the F.R. Wall Assembly. This unit comes ready to mount on the wall and when connected up with the air supply, feeds pure dry air to the gun at any desired pressure.

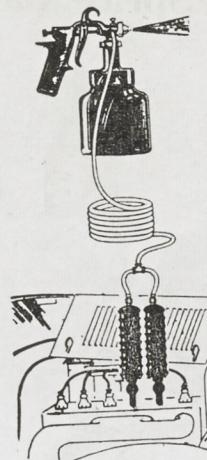

Constructed on an entirely new principle, this air filter has no renewable pads or felts and only requires to be drained at intervals. The regulator is unusually sensitive and gives the operator complete control over spray pressure. Made entirely of brass, heavily nickel plated and with outlets for two guns, this unit will give a lifetime of service.

Each \$30.00

No. 781

Auto Power Painter

This new Speedy Auto Outfit makes production painting possible anywhere. Attach to car or truck, run at idling speed, and paint barns, fences, houses, machinery, furniture, cars, etc.

By removing two spark plugs and inserting the two auto valves you convert two cylinders of the engine into air compressors. Complete set of adapters to fit all sizes of spark

plugs. Twenty-five feet of hose gives good working range, and up to 100 feet more air hose may be added without loss of power. The No. 111 gun used with this outfit is the same as used with No. 860, and like No. 860 the No. 778 pressure tank may be added if desired.

No. 781 Outfit complete \$33.50

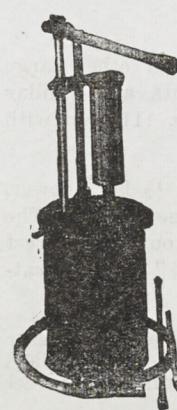

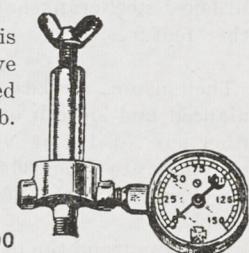

No. 140 Air Filter is tested to 200 lbs., has handy drain cock and interior is easily accessible.

No. 140 Air Filter only \$5.00

Regulator is very sensitive and is fitted with 150 lb. gauge.

No. 600
Regulator
Gauge \$9.00

Bondek Sprayer

An Ideal Applier

Experience has taught us that the most satisfactory and economical way of applying Calcimo is by the spray machine. A spray machine will force the liquid into every tiny pore, crack and crevice and seal the surface against the elements.

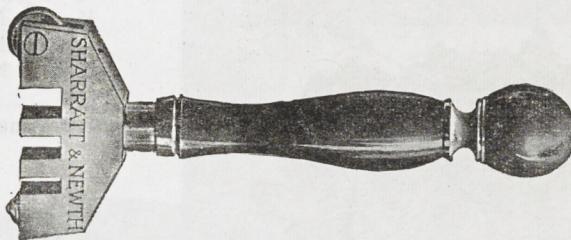

This machine has a six-gallon container.
 Each \$42.00

WINDOW GLASS

Your attention is drawn to the many features of Monarch Window Glass.

1. Full weight 18 oz., for singles and 24 oz. for doubles.
2. Extreme whiteness of metal, allowing the maximum light to pass.
3. Softness of metal, in cutting, even an inexperienced cutter will have no breakage.
4. Brilliant fine polished finish on both surfaces. Glass that can be glazed with either side out, requiring no special handling for glazing and almost eliminating breakage risk either in transit or glazing.
5. Flatness and regularity of thickness.
6. Packed in special heavy cases which insures the purchaser against breakage in transit.

Surface hardener, makes concrete floors dust-proof, oil-proof and acid-proof.
Per lb. \$1.20

Pudlo Cement Water Proofing

FLOODED CELLARS

A CERTAIN and inexpensive remedy is to line the inside of the cellar with cement and

'PUDLO'

BRAND
CEMENT WATERPROOFER

Ask us for particulars—free

Pudlo is an integral waterproofer for all cement and concrete work. It has remarkable water-repellent, lubricating and densifying properties, converting the cement into an absolutely impermeable matrix. "Pudlo" must not be confused with inert or chemical fillers and lubricators which have no inherent water-resisting properties.

When this waterproofing powder is included in the usual cement mortar or in concrete, in the correct proportions, it absolutely prevents the penetration of water, moisture, frost, mineral oils, etc.

Stocked in 17, 25 and 50 lb. ctns.... per lb. \$.58
Per lb., loose60

ZONOLITE

For Economical Insulation

Odorless
Verminproof Waterproof
Fireproof
